

## **Research Position in Scene Interpretation**

at the Cognitive Systems Laboratory, Department of Informatics, University of Hamburg

Applications are requested for a research position in the **EU-funded project "eTraining for the Interpretation of Man-made Scenes (eTRIMS)"**, duration until 3/2009.

The Cognitive Systems Laboratory at the University of Hamburg has a long-standing record of leading-edge research in Computer Vision and Artificial Intelligence. One of our focus areas is scene interpretation and the connection of vision processes with common-sense knowledge. Here we look for a researcher with a strong background in system development and scene interpretation.

Work will be carried out in close cooperation with other members of the team at the Cognitive Systems Laboratory and with international partners in eTRIMS.

Hamburg is one of the most beautiful towns in Germany which offers all attractions of a metropolitan city while retaining a natural and lovely environment.

Applicants must have an **above-average university degree in Computer Science and competence both in Computer Vision and Artificial Intelligence.**

Please send applications to
